1:05 PM	Q&A and meeting close	Anthony Chan

This Pfizer Global Medical satellite symposium is intended to provide scientific and educational information on the burden of disease in hemophilia. The content is non-promotional in nature and does not include any product-related information, and is presented in accordance with applicable local laws, regulations, and industry codes of conduct. This session is primarily intended for healthcare professionals. However, as the symposium is conducted in conjunction with the World Federation of Hemophilia (WFH) Congress, members of the public, patients, and patient advocacy representatives may be present. In light of this, the information presented is provided solely for general scientific and educational purposes and must not be interpreted as medical advice, diagnosis, or treatment recommendations for any individual. Any clinical information discussed is of a general nature only and does not replace consultation with a qualified healthcare professional. Patients should always seek advice from their own healthcare professionals regarding individual medical care and treatment decisions. Content reflects scientific perspectives available at the time of presentation and is compliant with local regulatory requirements in Malaysia.
